Inspirational week

Shaima Almansoori

From relentless days of hard work to fashion's biggest stages, Shaima Almansoori, Bahrain's own talented fashion designer fell in love with the sophisticated world of fashion design from the age of six, when she was experimenting with pencils and charcoal at her mother's workshop who also majored in fashion design at the United Kingdom. Shaima made her first appearance in the fashion world the year 2003 and made a name for herself during her 14 years as a designer, after launching her renowned brand "Monsoori", which is inspired by three key elements: Architecture, nature and art. "Monsoori" was worn by Hollywood's biggest names such as Beyonce, Ariana Grande, Kylie Jenner, Winnie Harlow, Cindy Crawford, Celine Dion and Heidi Klum.

Huda Janahi

From the banking sector to the equestrian world, introducing you this week to the owner of Horse Pride Equestrian Equipment. 2003 is considered the year that reshaped Huda's life completely, when she decided to follow her lifelong passion and open Horse Pride, to become the kingdom's first Bahraini Woman to own a business in this line of work, Horse Pride also became the GCC's first business to manufacture, sell and export top of the line equestrian equipment. Huda also launched Bahrain's first female showjumping team, aligned with the ambitions and instructions of His Highness Shaikh Nasser bin Hamad Al Khalifa, His Majesty the King's Representative for Humanitarian Works and Youth Affairs.

Shaima Al Meer

Bahraini women have been able to shine in different sectors around the kingdom, and there is no doubt that Information Communication Technology graduate, Shaima Al Meer, is a fine example for young Bahraini excellence. As a part of her graduation project at Bahrain Polytechnic, Shaima was able to develop Bahrain's very first robot assistance, programmed to serve and assist customers at Bahrain Islamic Bank in speech and motion as well. Shaima currently works in the National Space Science Agency as a space data analyst, and was able to achieve a number of accomplishments such as first place in a training program provided by Twente University at the Netherlands, and third place in a hackathon in space technology at the University of Saint Petersburg at Russia, in addition to more achievements.
