2. CREDIT RISK

Credit risk is the risk of financial loss to the Group if a customer or counterparty to a financial instrument fails to meet its contractual obligation. The Group is principally exposed to credit risk on cash and cash equivalents, loans and advances to customers, trade receivables and other assets. The maximum credit risk is the carrying value of the assets.

Management of credit risk

The Group's credit risk management framework includes:

- Establishment of authorisation structure and limits for the approval and renewal of credit facilities;
- Reviewing and assessing credit exposures in accordance with authorisation structure and limits, prior to facilities being committed to customers. Renewals and reviews of facilities are subject to the same review process;
- Diversification of lending activities;
- Reviewing compliance, on an ongoing basis, with agreed exposure limits relating to counterparties and reviewing limits in accordance with risk management strategy and market trends.

2. Credit risk (continued)

All loans and advances are with local individuals and locally incorporated entities. The credit risk on these loans and advances is actively managed and rigorously monitored in accordance with well-defined credit policies and procedures. The creditworthiness of each borrower is evaluated prior to lending and with a comprehensive review of information which includes the Credit Bureau report. The Group is also subject to single obligor limits as specified by the Central Bank of Bahrain. Credit review procedures are in place to identify at an early stage exposures which require more detailed monitoring and review. Appropriate procedures for follow-up and recovery (including recourse to legal action) are in place to monitor the credit risk on loans and advances.

Exposure to credit risk

The Group is not exposed to any significant concentration of credit risk arising from exposures to a single debtor or debtors having similar characteristics such that their ability to meet their obligations is expected to be affected similarly by changes in economic or other conditions. Regular audits of business units and Group credit processes are undertaken by the Internal Audit department.

The Group measures its exposure to credit risk by reference to the gross carrying amount of financial assets less amounts offset, interest suspended and impairment losses, if any. The maximum credit risk exposure of the loans and advances is the carrying value amount net of the deferred income and net of impairment allowance.

	30-Jun-17
Specifically provided loans	
Gross amount	682
Impairment allowance	(483)
Net amount	199
Collectively provided loans	
Neither past due nor impaired	240,421
Past due but not impaired	51,224
Impairment allowance	(9,410)
Net amount	282,235
Net loans and advances to customers	282,434

Specific impairment

The Group considers evidence of impairment for all individually significant loans and advances which are assessed for impairment on a specific basis.

Collective impairment

A collective loan loss allowance is established for groups of homogeneous assets which have not been specifically assessed for impairment or assessed individually and found not to be impaired; in respect of losses that have been incurred but have not been identified,

2. Credit risk (continued)

Past due but not impaired loans and advances include those for which contractual interest and principal payments are past due but the Group believes that impairment is not appropriate on the basis of level of security and collateral available and/ or in the process of collecting the amounts owed to the Group.

At 30 June 2017, the total gross amount of non-performing loans as defined by the CBB was BD 9,121. In compliance with the CBB requirements, interest on non-performing loans is placed on a non-accrual status and interest on such loans and advances is reversed from income and is accounted for on a cash basis.

During the period ended 30 June 2017, the average gross credit exposure for cash and balances with banks is BD 3,698, loans and advances to customers is BD 272,625, trade and other receivables is BD 8,618 and unutilised credit limit is BD 21,878. Such amounts are calculated based on the average of last four quarterly results.

At the reporting date, the loans and advances to customers represent 52% vehicle, 21% mortgage, 19% unsecured lending and 8% credit card lending.

The below table show the geographic distribution of exposure as of 30 June 2017:

	Bahrain	Kurdistan	Total
Cash and balances with banks	3,574	3	3,577
Loans and advances to customers	282,232	202	282,434
Trade receivables	8,540	328	8868
Total	294,346	533	294,879
Unutilised credit limit	26,103	-	26,103

2. *Credit risk (continued)*

Impaired loans and advances

Impaired loans and advances are financial assets for which the Group determines that it is probable that it will be unable to collect all principal and interest due according to the contractual terms of the agreements.

The Group's exposure to credit risk from loans and trade receivables from automotive business is influenced mainly by the individual characteristics of each customer. Loans which are past due 90 days and above are considered as non-performing.

The Group has established policies and procedures under which each customer is analyzed individually for creditworthiness. At the period end, trade receivables of BD 1,551 were past due against which the Company have provided for BD 505 as an impairment allowance. Substantially all commercial past due receivables are less than one year.

Loans with renegotiated terms and the Group's forbearance policy

Loans with renegotiated terms are loans that have been restructured due to deterioration in the borrower's financial position, where the Group has made concessions by agreeing to terms and conditions that are more favourable for the borrower than the Group has provided initially.

The Group implements forbearance policy in order to maximise collection opportunities and minimise the risk of default. Under the Group's forbearance policy, loan forbearance is granted on a selective basis in situation where the debtor is currently in default on its debt, or where there is a high risk of default, there is evidence that the debtor made all the reasonable effort to pay under the original contractual terms and it is expected to be able to meet the revised terms.

The revised terms usually include extending maturity, changing timing of interest payments and amendments to the terms of loan covenants. Both retail and corporate loans are subject to the forbearance policy. The Group Audit Committee regularly review reports on forbearance activities. During the period ended 30 June 2017, loans and advances amounting to BD 318 were restructured.

Write-off policy

The Group writes off any loans (and any related allowances for impairment) when the loans are deemed to be uncollectible.

Collateral

The Group generally holds collateral against loans which may be in the form of mortgage interests over property with custody of title deeds, joint registration of vehicles and/or additionally post dated cheques/promissory notes and personal guarantees.

As at 30 June 2017, loans amounting to BD 185,821 were fully collateralized and loans amounting to BD 25,378 was partly collateralized with a collateral value of BD 22,920.

2. Credit risk (continued)

Management estimates the fair value of collaterals and other security enhancements held against individually impaired loans are reasonably sufficient to cover the value of such loans at the reporting date. The Group monitors concentrations of credit risk by product.

As at 30 June 2017, the Group obtained assets of BD 775 by taking possession of collateral held as security against loans and advances.

Credit risk concentration

Credit risk concentration of loans at the reporting date represents 89% retail loans and 11% to corporate customers and trade receivables represent mainly corporate customers.

As at 30 June 2017, the unutilized credit limit for corporate and retail customers was 13% and 87% respectively.

Settlement risk

The Group's activities may give rise to risk at the time of settlement of transactions and trades. Settlement risk is the risk of loss due to the failure of a counter party to honour its obligations to deliver cash, securities or other assets as contractually agreed.

Derivative related credit risk

Credit risk in respect of derivative financial instruments arises from the potential for a counterparty to default on its contractual obligations and is limited to the positive market value of instruments that are favourable to the Group which are included in other assets. The positive market value is also referred to as the "replacement cost" since it is an estimate of what it would cost to replace transactions at prevailing market rates if a counterparty defaults. The Group's derivative contracts are entered into with other financial institutions.

Credit risk related to trade receivables

Credit risk related to trade receivables arises from the potential for a counterparty to default from repayment of their dues. The Group has established an appropriate authorisation structure with limits for the approval and renewal of credits.

3. CAPITAL MANAGEMENT

The Group's policy is to maintain a strong capital base. The Central Bank of Bahrain sets and monitors capital requirements for the Group. The conventional financing company license granted by the Central Bank of Bahrain limits borrowings to five times the capital and reserves (shareholders' equity) of the Company. Such rate for the Group was 1.95 as at 30 June 2017.
